SPECIAL 2014: Packaging & more

Eight different models

Band saws from Mado (Dornach, Germany) are designed to meet the most varied needs of butchers, the meat industry, cutting plants, chain stores or large-scale canteen kitchens. Mado's eight different variants provide customers with solutions that are tailored as needed and that suit the required use.

All band saws are based on the most recent developments for rational, hygienic food processing and are manufactured of stainless steel. They cut everything

The MKB 758 industrial bone saw with roller table is manufactured completely of stainless steel.

precisely and cleanly, no matter whether the product is meat, cartilage, poultry, fish or frozen wares. All models have the necessary safety equipment such as a pressing apparatus, height-adjustable belt protection, a solenoid-operated door switch and an engine brake. The Mado band saws with their ergonomic design can be cleaned perfectly with the high-pressure cleaner. The machines have a cutting height passageway of from 230 mm to 515 mm.
